The point is merely that we should distinguish these distinct roles that moral norms might play and avoid criticizing a norm in one role by standards appropriate only if the norm is understood to be playing a different role. We discuss recent analyses of the requirements for the design of electronic dictionaries, building primarily on the accounts by de SchryverChiariHeid and Tarp These requirements suggest a richer formalization of dictionary models than is usually the case in traditional database and plain XML-based approaches, and we therefore argue in favour of a formalisation of these

requirements in the framework of a strongly typed formalism.
